

FY-COMPOSITES

AFTER SALES SERVICE

We Maintain Your Composites

You Use, We Maintain

Our operating principle is to take good care of our customers' composite products. The maintenance agreement, which is valid throughout the entire life cycle of the product, ensures the best possible performance and benefits. We inspect, maintain and repair composite products, and also make changes to them if necessary.

The training and technical support we offer ensure that customers will be able to enjoy the best properties of composites effectively and over a long period. At best, effective training can also extend the life cycle of our products.

Service packages can be built from the following elements according to need:

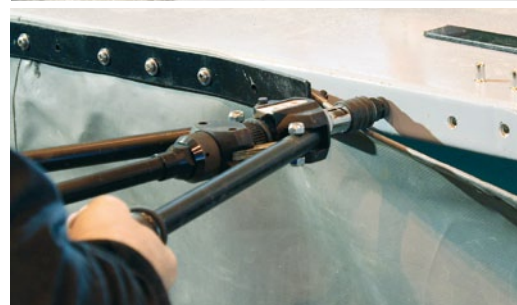

- Inspection and maintenance repair
- Annual service
- Spare parts service
- Damage repair
- Technical support
- Training
